

WONDEROUS WOOL

Wool is the soft, thick hair that grows on the bodies of sheep and other animals. Lanolin is the yellow fat found naturally in sheep's wool.

Wool qualities

- 100% Biodegradable
- 100% recyclable
- 100% renewable
- Absorbent
- All season
- Anti-bacteria
- Anti-microbial
- Anti-static
- Anti-wrinkle
- Breathable
- Durable
- Dyes beautifully
- Eco-friendly
- Easy to care for
- Elasticity
- Fashionable
- Felt-ability
- Fire resistant
- Hypoallergenic
- Insulating
- Moisture wicking
- Natural UV protection
- Odor resistant
- Retains shape
- Stain resistant
- Strength
- Sustainably produced
- Versatility
- Warm and cool

Humans have been washing, weaving, and wearing wool since the Stone Age. Wool was one of the first commodities to be traded internationally and played an important role in colonial America. It is still very important in many states and on many US farms and ranches.
